Dear ,

Thank you for your request for information, which we received on 26/07/2026.
We have considered your request under the Freedom of Information Act 2000.
Please ensure you quote the Internal Reference number above in any future correspondence.

Your Request

Please provide the following information for Crowborough Army Camp, Crowborough, East Sussex (including TN6 3SX and any other postcode or address identifier used for the site) for the period from 22 January 2026 to the date this request is processed.

The number of 999 ambulance incidents attended, broken down by calendar month.

The number of patients conveyed to hospital, broken down by calendar month.

Where held, the number of incidents by dispatch category (e.g. chest pain, breathing problems, falls, unconscious patient), aggregated by calendar month.

Formal Response

Total Ambulance Callouts: The count of incidents where an ambulance attended the scene.

Total Ambulance Conveyances – A subset of Total Ambulance Callouts, this is the total count of incidents where a patient was conveyed to hospital by an ambulance

Location – All of the data for this question is for cases where the incident location was similar to 'Crowborough Training Camp' or the incident location post code was either 'TN6 3SX' or 'TN6 1UB'

The Trust can confirm that this information exists. However, where an output represents fewer than 5 individuals or incidents in the period requested, we have not provided exact figures. This practice is known as data blurring, which serves to mitigate against the risk of possible re-identification of individual data subjects via data recombination (sometimes referred to as jigsawing). This risk is assessed in accordance with the Information Commissioner's Office (ICO) Anonymisation Code of Practice.

Due to the low number of incidents, we are unable to provide a breakdown by symptom type as this could increase the risk of identifying individuals when combined with other information.

Date Range: 22/01/2026 - 28/07/2026

Please refer to the table:
