Please Note

- 1. The provided data is showing the number of ambulance journeys with a handover to hospital time, we don't specifically record the number of ambulances queuing outside A&E. Please note these may include patients being taken to other departments in the hospital not specifically A&E**
- 2. The data is provided in separate tables by month showing hospital handover times over 30 and 60 minutes, split by hospital, Handover and time. Please note: The totals for >60mins minutes would be included in the >30mins Total.**
- 3. Handover delay data requires a manual button push. Only approximately 80% of all hospital journeys have a button push in A&E department, (by the ambulance crew, the hospital or both). This means 20% of the journeys do not have the handover times recorded and are not represented. Data recording compliance by hospitals ranges from 50% for the least to 95% for the most.**
