Dear,

I am writing in response to your enquiry under the Freedom of Information Act 2000 (FOIA) reference FOI/18/04/04.

You requested the following information, please also see our response below:

**1. List of locations with details of all the Established Based Sites and Public Access Defibrillators you are aware of in South East Coast Ambulance Service NHS Trust area.**

**Location description e.g. Building / Shop name**

**Location Post code**

Please find attached list of Public Access Defibrillator locations. Please note that these are only the sites which we have been given permission to share publicly by the site owners. Therefore, there may be other PAD sites to which callers would be directed to if they were to call 999 and require a defibrillator that are not included in the table below.

Please note locations in red denote sites that are temporarily unavailable.

**2. The data that you hold on the number of under 45 year olds that have cardiac arrests (category 1 / red 1 and Category 2 / red 2) within the South East Coast Ambulance Service area for the last 3 years.**

Please see table below which shows the number of incidents attended by a crew where the problem nature selected was one of the following:

- Cardiac/Respiratory Arrest
- Death Expected <18
- Death Expected >18
- Death Unexpected all ages

Financial Year	Total Incidents	Under 45*
2015/16	7477	
2016/17	8038	
2017/18	8181	579

The Trust introduced a new Computer Aided Dispatch system in July 2017 which allowed for the patients age to be recorded. The number of incidents where age was recorded and was under 45 is shown in this column.

I hope you find this information of some assistance.

If for any reason you are dissatisfied with our response, kindly in the first instance contact Caroline Smart, Information Governance Manager via the following email address:
