4) What your current guidelines to staff is in regards to what equipment they take into every patient contact.

We do not have guidelines for 'every patient contact', this is down to staff discretion. In most emergency cases crews will bring a defibrillator and primary response bag, as well as any of the specialist bags that may be needed based on the dispatch information

I hope you find this information of some assistance.

If for any reason you are dissatisfied with our response, kindly in the first instance contact Caroline Smart, Information Governance Lead via the following email address:
